Scope of work

In connection with the project to replace ventilation units in the data block Thormøhlensgate 55, the following works that could affect users of the building are planned in week 18,19 and 20:

- Friday 05.05: Work on roof off ventilation room 9th floor May cause some noise, but it is **not** expected to spread much further down the floors.
- Tuesday 09.05: Work on ventilation. Will be loss off supply air in part of plan 1 (see attached sketch)
- Monday 15.05: Crane of materials. Will cause noises in the floor when lifting.

More detailed information will be sent out at a later date for works planned in June and further on for the rest off the project period.

The work could cause some noise from the crane and from work on the roof on the 9th floor. In the case of particularly noisy work, this must be carried out in periods when there is the least possible disturbance to other activities in the building. Work such as sawing and drilling in concrete is covered by this restriction. Normally, such works will be carried out between 06.00 and 09.00 or after 16.00.

Areas around the crane will be cordoned off.

Parking for service vehicles and bicycle parking in the area will be closed during the period when crane work is being carried out.

The entrance/exit to the data block will be cordoned off when crane work is carried out. Alternative entrance/exit is via the main entrance to Thormøhlensgate 55. see attached sketch

There will be a guard present on the ground during lifting.
