

# Setting up your parking agreement and parking with Feide login

Download the app: <https://play.google.com/store/apps/details?id=se.knowit.pn.parkering.android>  
or here: <https://apps.apple.com/us/app/park-nordic-parkering/id6503038936>

First-time users must create a new account. Enter your email address and follow the steps. Once you have entered your email, tap «Fortsett» (Continue). You will then receive a 5-digit code by email that you use to log in on the next screen. Your account has now been created.

App Store

Google Play

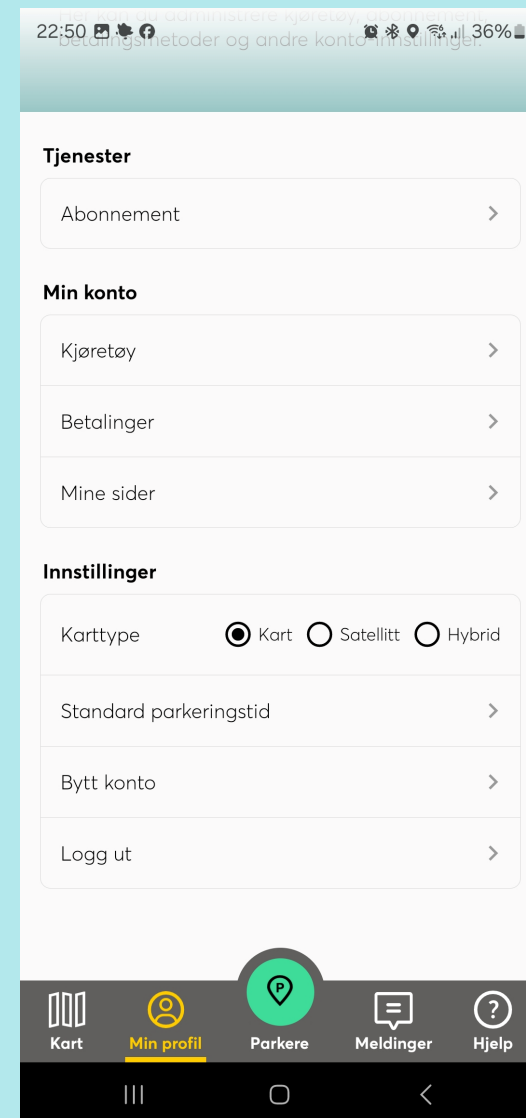

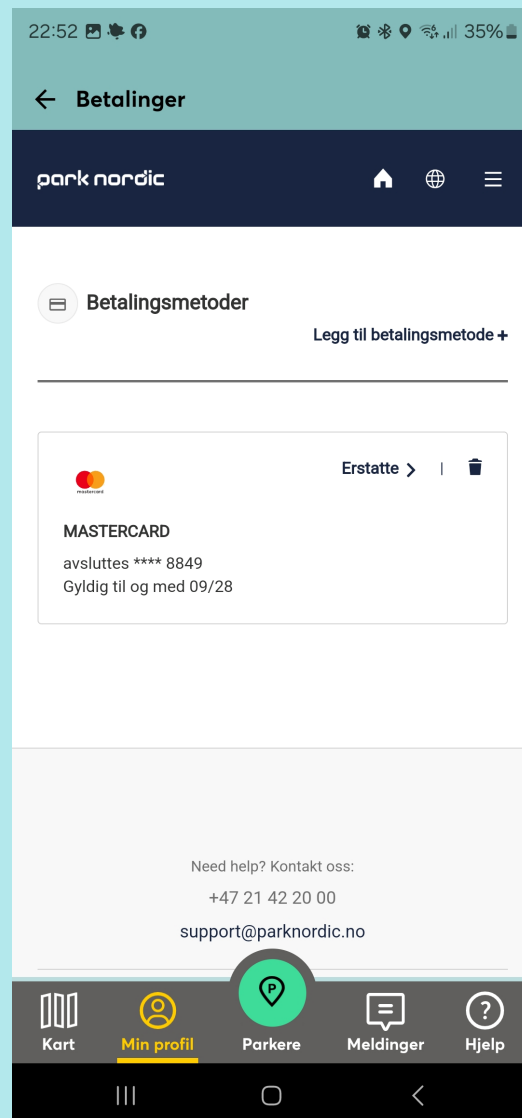

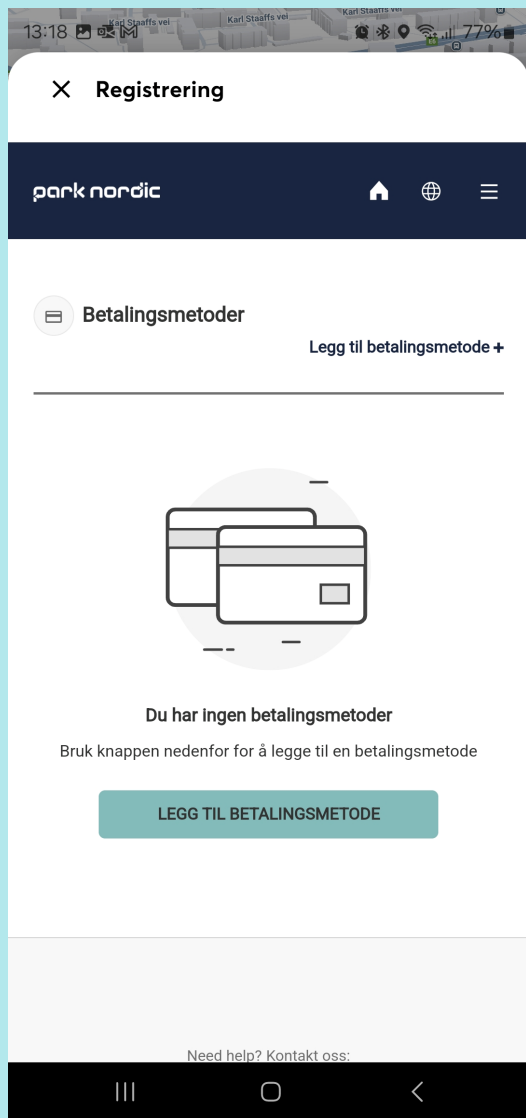

### Students and employees with Feide:

Those who have Feide log in with a valid email address so that they can receive the registration code.

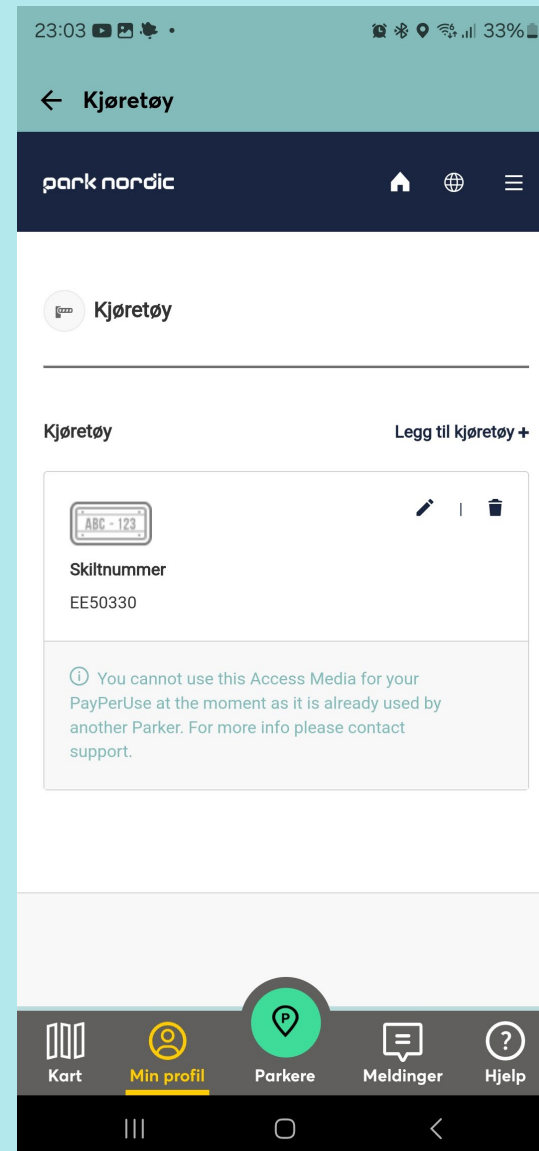

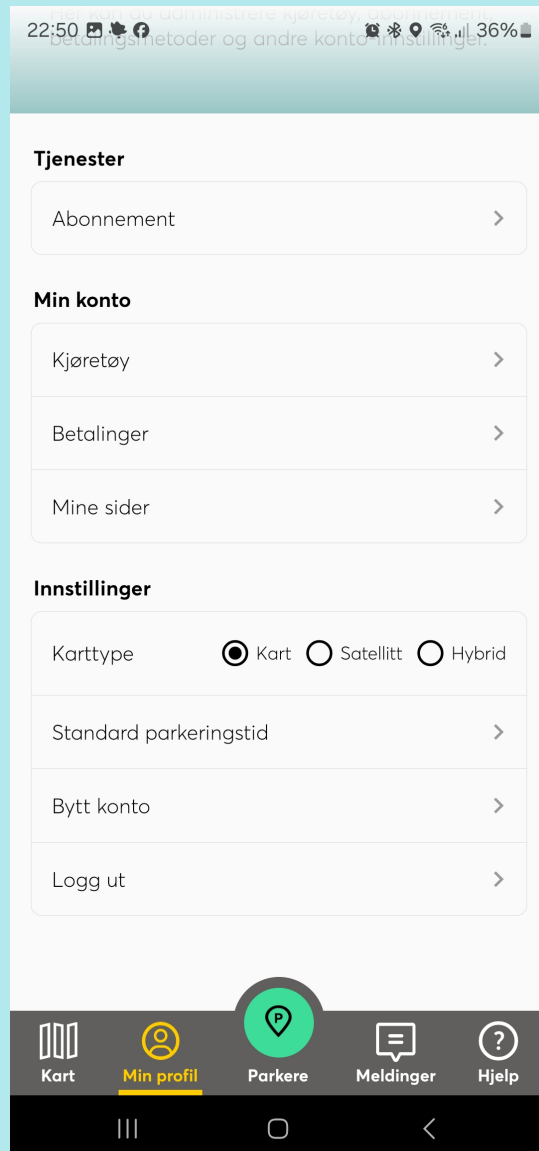

### External users affiliated with UiB:

External tenants/users of UiB's parking areas must buy daily/weekly/monthly parking in the app. Access is granted by a special code from UiB, which you enter under «Abonnement» (Subscription) in the «Min profil» (My profile) tab.

Complete your profile by adding a payment method. You can register several payment cards if you wish. This is managed under «Betalinger» (Payments) in «Min profil» (My profile).

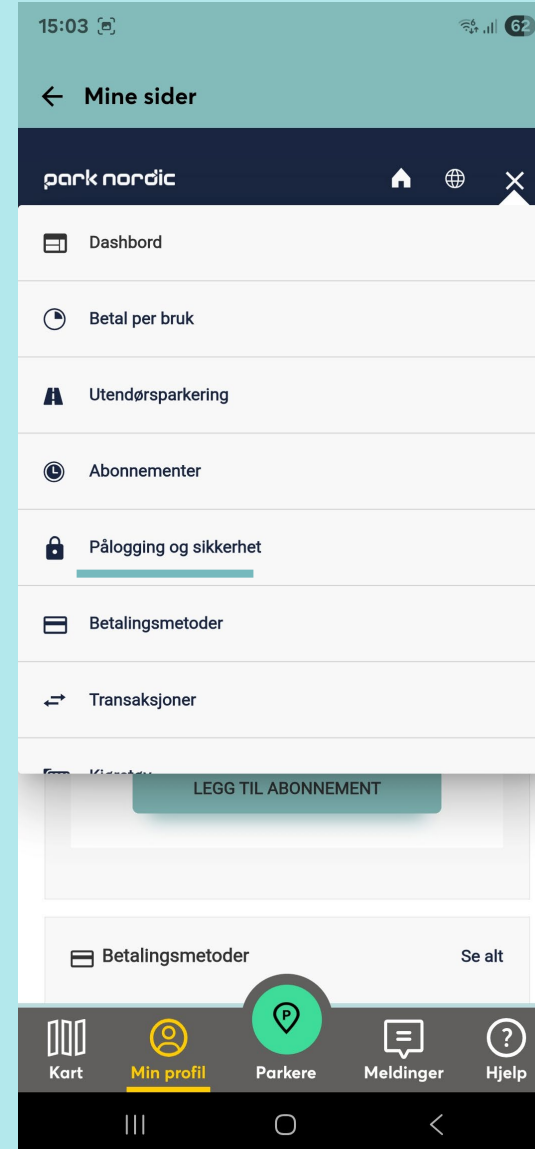

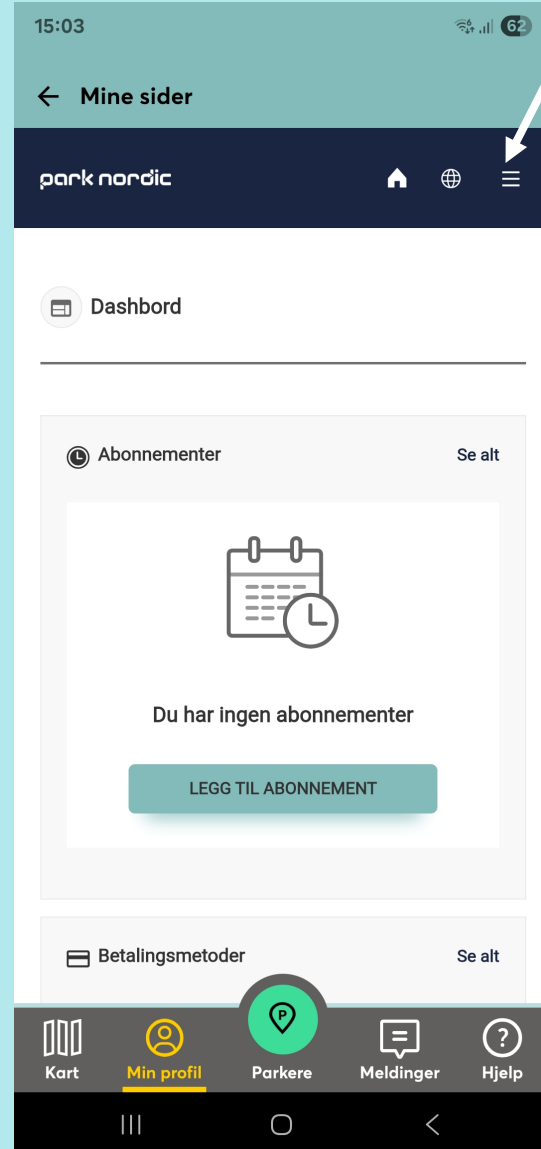

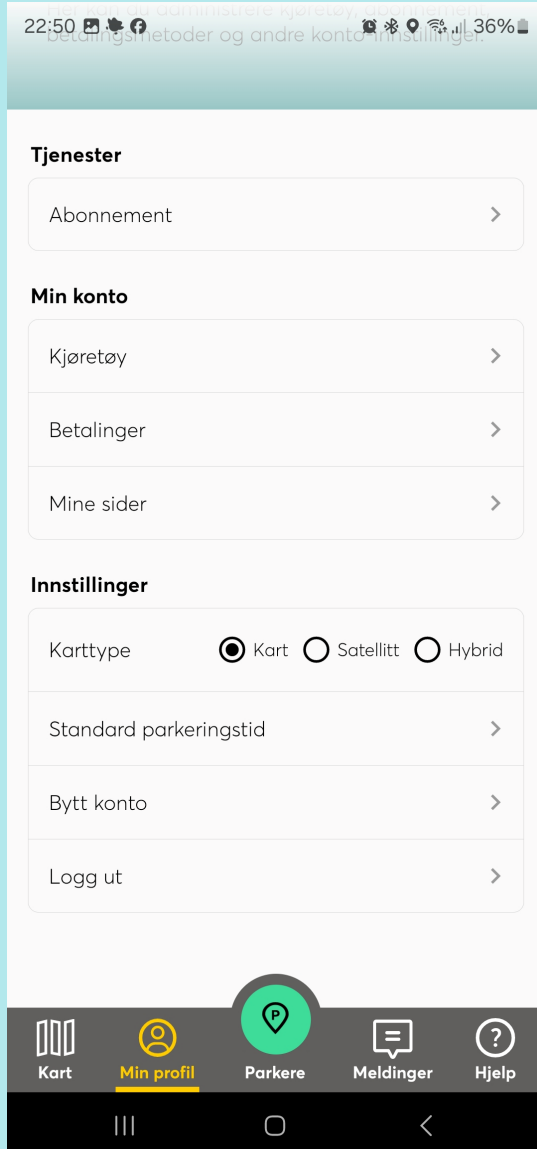

Once your profile has been created, you need to register your vehicles. You can register up to 4 vehicles. This is done under «Min profil», where you will find all the necessary options.

# For Feide users

Students and employees link their app account to their Feide account.

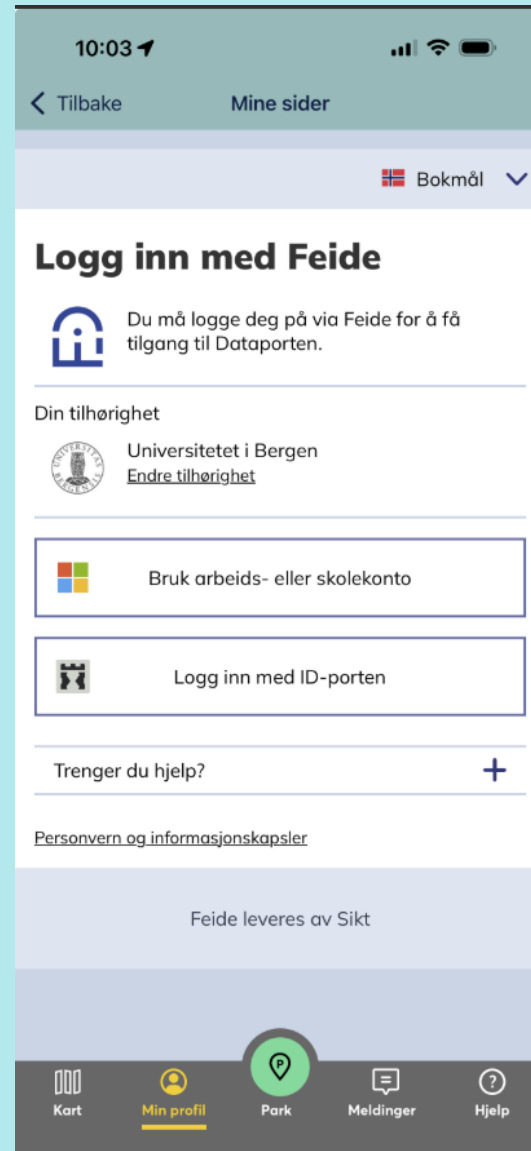

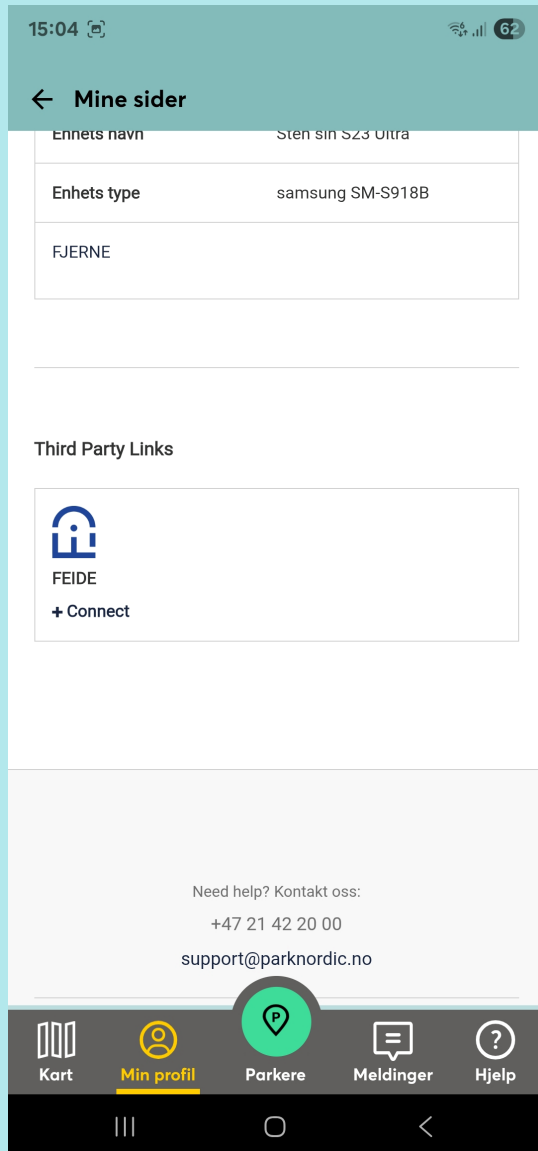

In «Min profil», tap «Mine sider» (My pages), then the menu in the top right and select «Pålogging og sikkerhet» (Login and security).

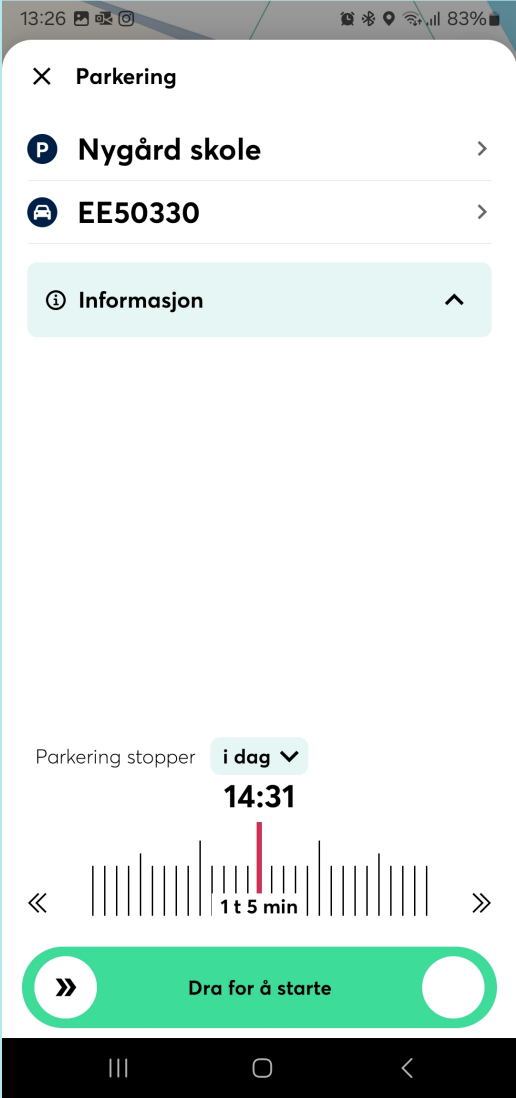

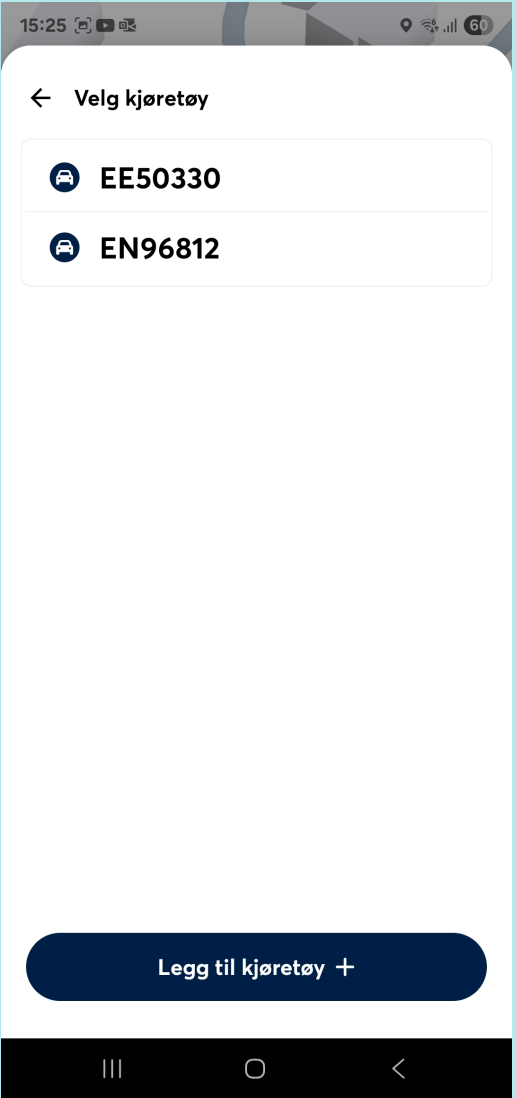

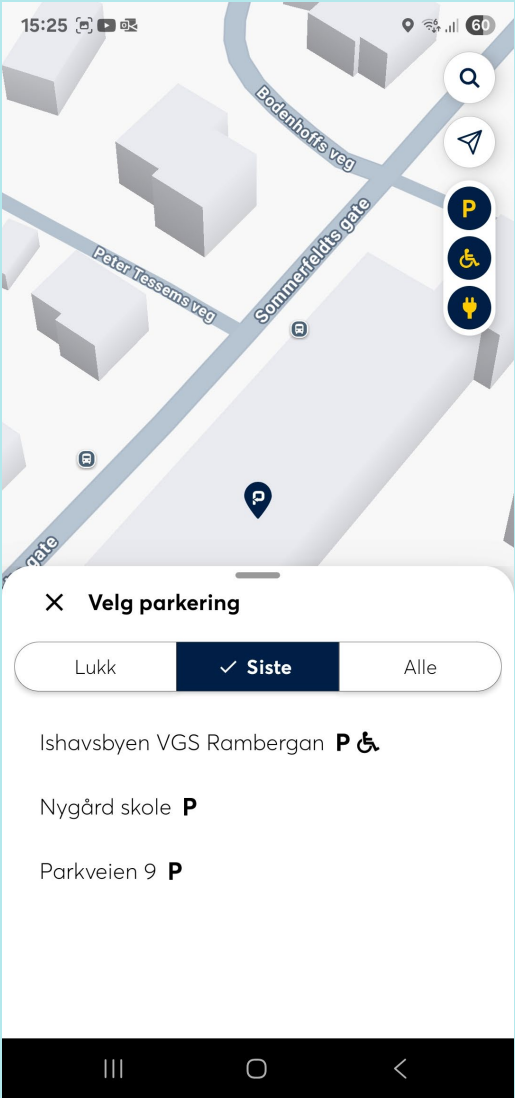

## For Feide users

In this menu, scroll down to the Feide logo, where you link your Feide account to your app account. You are then sent to Feide, where you select your affiliation (select «Universitetet i Bergen») and log in with your username and password (select «Bruk arbeids- eller skolekonto» / Use work or school account).

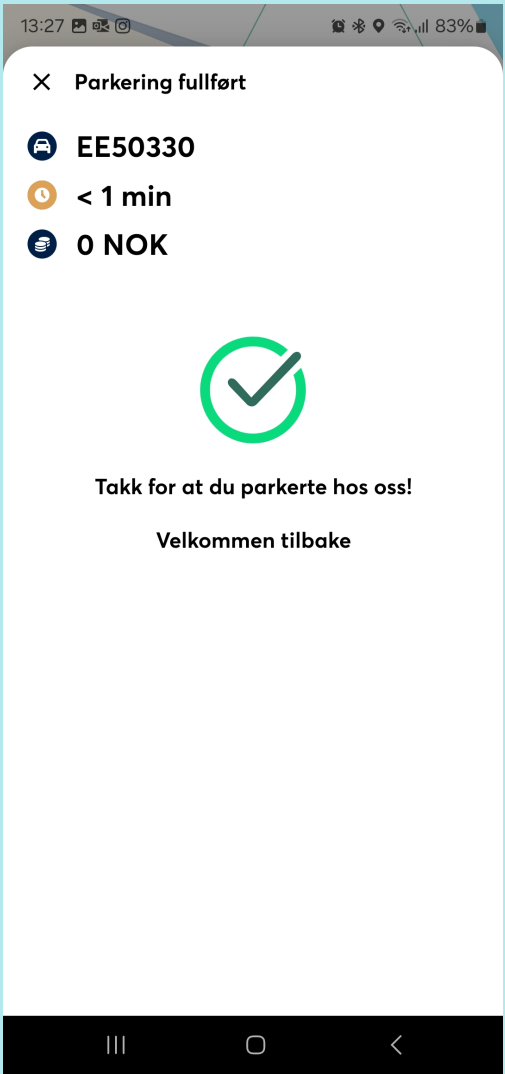

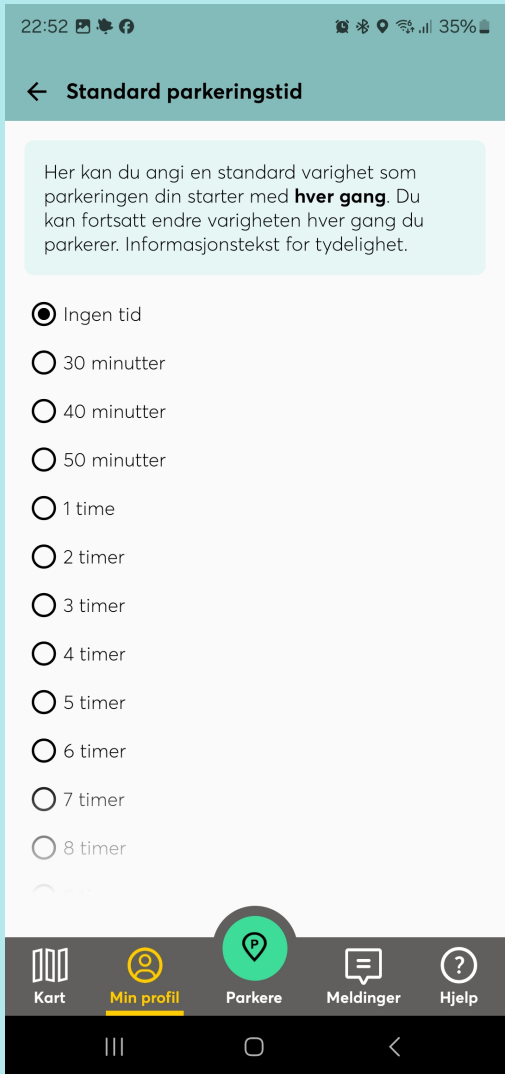

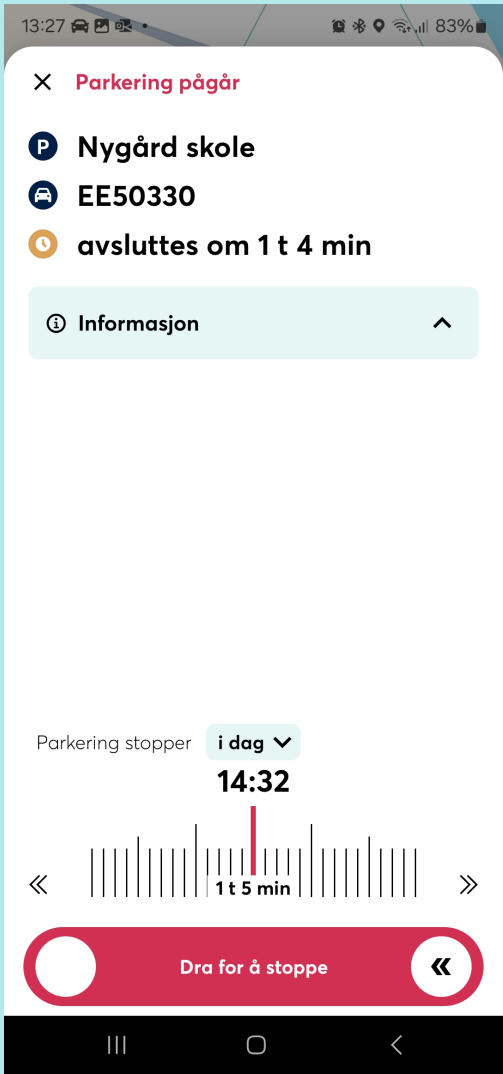

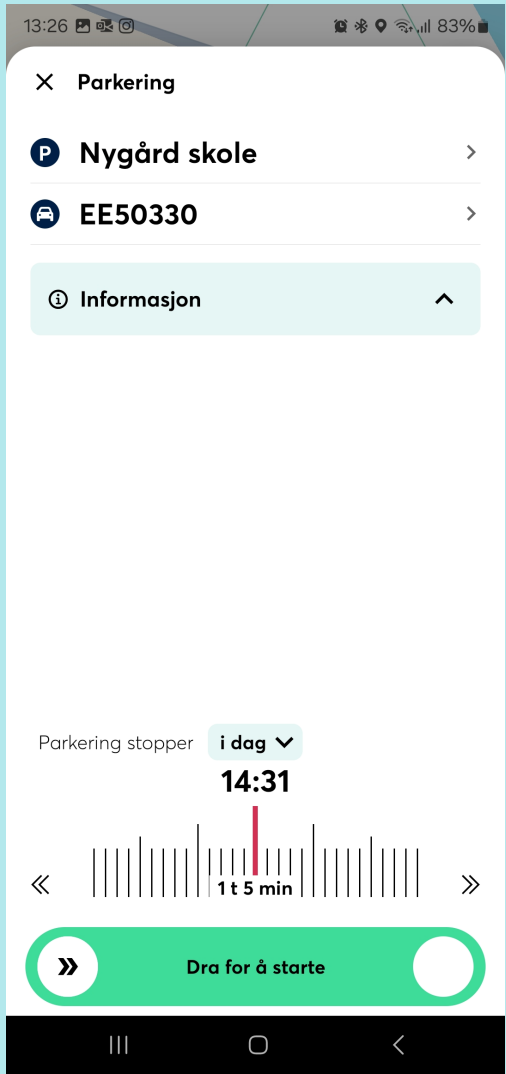

Once this is done, you are verified and hold a valid parking permit for UiB's free parking spaces for employees/students.

To park, tap «Parkere» (Park). You can then choose from the map or from a list of the car parks you have used most recently. You can also select accessible (HC) spaces, charging spaces or ordinary spaces. Feide users automatically hold a valid parking permit once they have linked their Feide account. Other employees and external tenants automatically hold a valid parking permit by having registered with their work email/an email that is specially registered, or by buying a subscription with a special code.

You select the duration by dragging the timeline forwards or backwards, and start the session by sliding the green bar to the right. You stop it by dragging to the left. In «Min profil» you can predefine the duration every parking session should start with, under «Standard parkeringstid» (Default parking time) – so that you do not have to scroll to the desired time every time.

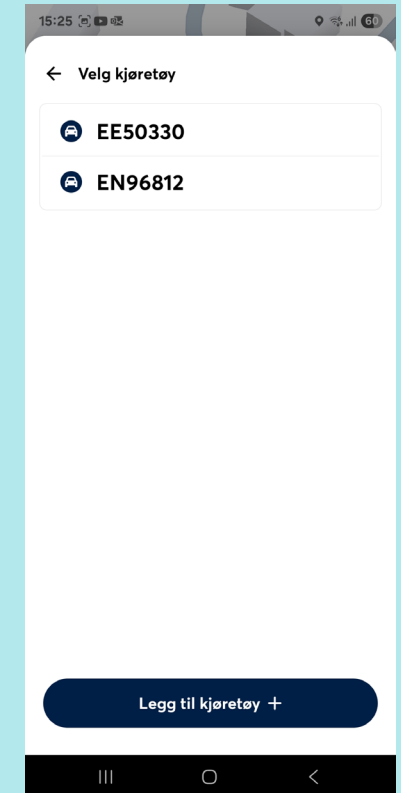

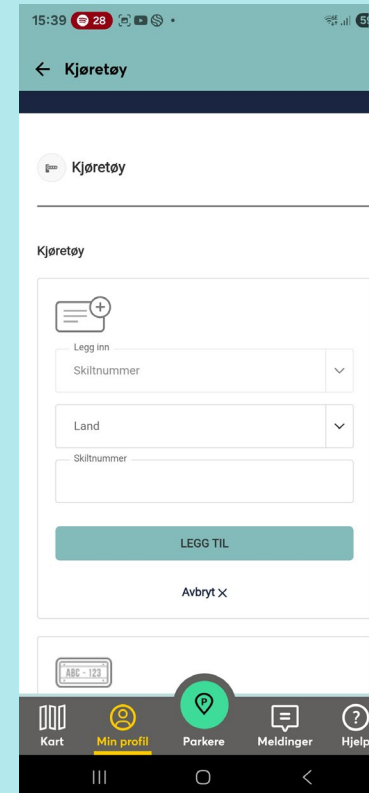

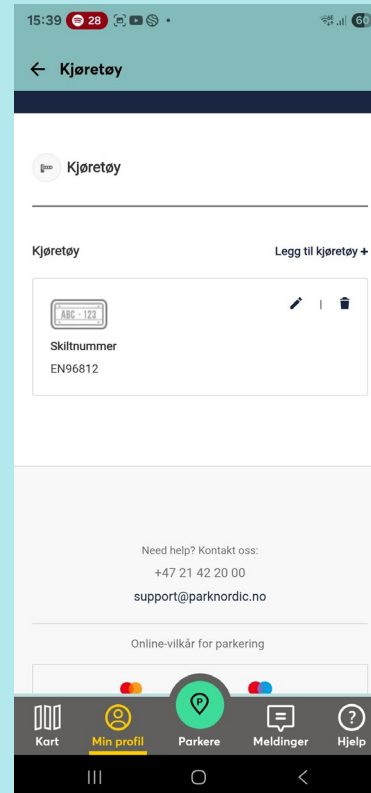

# Select vehicle

You register vehicles in your profile with the registration number and country.

You can register up to 4 vehicles.

When you start a parking session, you choose which vehicle you are using under «Velg kjøretøy».

# For camera-controlled car parks (Årstadveien 19)

Here you must also activate a subscription linked to your Feide account in order to get the UiB employee and student parking rate.

You will find the product by tapping «Min profil», «Abonnement», «Kjøp abonnement» (Buy subscription). It is then shown on the first page under «Spesial tilbud for deg» (Special offers for you).

Each parking session is automatically charged at NOK 10 per hour, max. NOK 60 per day, debited from the payment card registered on your account after you exit.
