INTRODUCTION LETTER TO ERC MENTORS

A signed electronic copy can be sent to the mentor. Please delete text in red before sending.

Dear (name of mentor),

Thank you for your willingness to support (name of UiB researcher) as they develop their ERC /StG/CoG/AdG) application.

At UiB we operate a programme of strategic support for ERC applicants. As part of this, we offer candidates the opportunity to engage an ERC mentor. Your role is to support your mentee as they develop their ERC research concept and draft their grant proposal.

ERC mentors are usually expected to be subject experts in the mentee's field of research, who also possess extensive knowledge of the ERC instrument. You might, for instance, be an ERC grantee, have been a member of an ERC panel in the past or been engaged as an ERC expert evaluator.

The information sheet attached to this letter provides further details on how mentors and mentees can establish good working relationships, as contains details pertaining to contract and remuneration.

We hope that mentoring an ERC applicant will be a fruitful experience for you and your mentee and look forward to working forward with you.

Yours sincerely,
(Head of Institute)
