

Visit from Farsund municipality Institution and care homes

After hearing about the 5-D project on national TV news, Farsund Institutional and Care Homes (Farsund Instutisjon og Omsorgsboliger) got in touch with Bettina and expressed their wishes to participate in our study.

On January 14-15, 2025, the unit manager, Brite Rafoss, together with two department managers, Helene Kolnes and Ingrid Gabrielsen, took the trip to Bergen to learn more about the project. The two days were packed with theoretical and practical information about the sensors and questionnaires, explained by Anne Therese, Tanja, Farzana, Kamilla and Bettina.

We are very excited about the new collaboration with Farsund and aim to start the data collection there soon!
