UiB Ferd – Career Center for Early-Stage Researchers

UiB Ferd Career Center for Early-Stage Researchers will support younger researchers in their career development. The center will offer individual career guidance and a variety of courses to increase the target groups' career awareness and competence. In addition, the center will offer competence development activities within generic and transferable skills. The Career Center will offer support in career planning and strengthen younger researchers' career skills to handle transitions and change. We are a team from both HR and the FIA and are happy to receive input on what such a career center can offer.
