

# WASTE MATERIAL NUMBERS

Waste material numbers are used to separate waste on the basis of properties which are important to the transport and handling of waste. The following list shows the waste material numbers in numerical order.

## List of waste material numbers

- 7011 Waste oil, with repayment
- 7012 Waste oil, without repayment
- 7021 Waste containing oil or fats
- 7022 Oil-contaminated matter
- 7023 Fuel and fuel oil
- 7024 Oil filters
- 7030 Oil emulsions and slop water
- 7041 Organic solvents, halogenated
- 7042 Organic solvents, **non**-halogenated
- 7051 Paints, adhesives, varnish. Based on solvents
- 7052 Paints, adhesives, varnish. Two-component
- 7053 Paints, adhesives, varnish. Based on water
- 7055 Spray cans
- 7081 Waste containing mercury ←
- 7082 Batteries containing mercury
- 7083 Waste containing cadmium ←
- 7084 Batteries containing cadmium
- 7085 Amalgam
- 7086 Fluorescent tubes
- 7091 Inorganic salts and other solid matter ←
- 7092 Lead accumulators
- 7093 Small batteries
- 7094 Lithium batteries
- 7095 Metal hydroxide sludges
- 7096 Slag, dust, fly ash, catalysts, blasting grit etc.
- 7097 Inorganic solutions and baths
- 7100 Waste containing cyanide ←
- 7111 Pesticides containing mercury
- 7112 Pesticides not containing mercury
- 7121 Polymerising matter, isocyanates
- 7122 Highly reactive matter
- 7123 Hardeners, organic peroxides
- 7131 Acids, inorganic
- 7132 Bases, inorganic
- 7133 Detergents
- 7134 Acid organic waste
- 7135 Alkaline organic waste
- 7141 Drilling mud and drill cuttings based on mineral oil
- 7151 Organic waste **containing** halogens
- 7152 Organic waste **not containing** halogens
- 7153 Medicine waste
- 7165 Contaminated waste water
- 7210 PCB and PCT-containing waste
- 7220 Photochemicals
- 7230 Halons
- 7240 Chlorofluorocarbons
- 7250 Asbestos
- 7261 Gases in pressure containers

} pure organic solvents in original packaging

} pure inorganic matter

} mixture of organic and inorganic matter

} organic solvents mixed with acids and various other substances
